

MUKESH KASHYAP

Curriculum Vitae

Bijnor, Uttar Pradesh, India — bcahons912@gmail.com — linkedin.com/in/mukeshkashyap — github.com/Mukesh3597

PROFESSIONAL PROFILE

Aspiring Machine Learning Engineer and BCA student specializing in Artificial Intelligence and Machine Learning at Vivek University. Building a strong foundation in Python, NLP, data analytics, and end-to-end ML deployment. Completed virtual job simulations with **Tata**, **Deloitte**, and **BCG X** on Forage. Developed and deployed multiple live ML web applications solving real-world problems in credit risk assessment, fake content detection, and automated resume screening. Actively seeking an ML / Data Science internship to contribute to impactful solutions.

EDUCATION & EXPERIENCE

Bachelor of Computer Applications (BCA)

Duration: January 2024 – January 2027

Vivek University, India

Specialization: Artificial Intelligence, Machine Learning & Web Development

GenAI Powered Data Analytics Virtual Intern

Duration: January 2026 – Present

Tata – Forage Virtual Experience — Remote

- Completed Tata's GenAI Powered Data Analytics Job Simulation on Forage
- Gained hands-on experience in data analytics, Python, and AI-driven insights
- Cleaned, visualised, and performed EDA on real-world datasets
- Applied GenAI tools to generate actionable, data-driven business insights
- Developed strong problem-solving skills in a simulated professional environment

Data Analytics & Machine Learning Virtual Intern

Duration: September 2025 – January 2026

Deloitte – Forage Virtual Experience — Remote

- Completed data analytics simulation using real-world business scenarios
- Performed comprehensive data preprocessing, analysis, and reporting workflows
- Developed analytical thinking and structured problem-solving methodologies
- Built a solid foundation in ML concepts relevant to enterprise analytics

Data Science Consulting Virtual Intern

Duration: 2025

BCG X – Forage Virtual Experience — Remote

- Completed BCG X Data Science Job Simulation on Forage
- Worked on client-focused data science tasks and business problem framing
- Applied analytical and ML techniques to derive actionable business insights

Machine Learning Intern

Duration: September 2024 – January 2025

Vivek University India — Remote

- Built predictive ML models and improved accuracy through feature engineering
- Collected, cleaned, and preprocessed datasets for training and evaluation
- Implemented ML algorithms: Linear Regression, Logistic Regression, Decision Trees
- Performed Exploratory Data Analysis (EDA) to identify data patterns and trends
- Visualised insights using Python libraries (Matplotlib, Seaborn)
- Documented workflows and collaborated effectively with team members

KEY PROJECTS

Deployed Live Applications

CreditGuard AI – Intelligent Loan Risk Assessment System

Live App: lnkd.in/enjrxNEv — GitHub: lnkd.in/eBQnPT43

End-to-end ML web application predicting loan default risk with probability score using RandomForest and OneHotEncoding. Logs all predictions into SQLite for history tracking. Deployed on Render as a production Streamlit app.

Tech Stack: Python, Pandas, Scikit-learn, Streamlit, SQLite, Git, Docker, Render

AI Fake WhatsApp Chat & Image Detector

Live Demo: lnkd.in/gX_nHXGn — GitHub: github.com/Mukesh3597/ai-fake-whatsapp-chat-detector

Detects whether a WhatsApp chat is Real, Fake, or Suspicious using NLP classification. Image detector identifies AI-generated (Fake) vs Real images using TFLite. Deployed live on cloud (Render).

Tech Stack: Python, Flask, Machine Learning, TFLite, Scikit-learn, HTML/CSS

AI Resume Shortlister – ATS-Style Automated Screener

Live App: lnkd.in/d48w5QaX — GitHub: lnkd.in/dk8Aug7a

Ranks multiple resumes against a Job Description using NLP (TF-IDF + cosine similarity). Displays match score, skills gap analysis, and highlights JD-matching resume lines. Containerised with Docker.

Tech Stack: Python, Streamlit, NLTK, TF-IDF, Cosine Similarity, Docker

Additional GitHub Projects

FactoryGuard AI – Industrial Fault Detection [GitHub](#)

Real-time ML model for factory equipment fault prediction and anomaly detection.

AI Fake Chat Detector [GitHub](#)

Standalone NLP classifier to detect AI-generated fake chat messages.

Student Performance Prediction [GitHub](#)

Regression-based ML model predicting student academic results from study data.

TECHNICAL SKILLS

Programming Languages

Python — SQL — HTML/CSS

ML & Data Science

Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, TFLite

Machine Learning: Classification, Regression, Decision Trees, RandomForest

NLP: NLTK, TF-IDF, Cosine Similarity, Text Preprocessing, Sentiment Analysis

Web Frameworks & Deployment

Streamlit, Flask, Docker, Render, Git, GitHub

Database & Automation

SQLite, SQL, Excel, UiPath RPA (Automation Developer Associate Training)

AI & GenAI Tools

GenAI-powered analytics, AI-driven insight generation, Prompt Engineering basics

CERTIFICATIONS & TRAINING

Industry Simulations (Forage)

Tata: GenAI Powered Data Analytics Job Simulation

January 2026

Deloitte: Data Analytics & Machine Learning Job Simulation

January 2026

BCG X: Data Science Consulting Job Simulation

2025

Technical Certifications

UiPath: Automation Developer Associate Training (Hands-on Orchestrator)
IIT Delhi: Virtual Labs – Practical computing modules

ACHIEVEMENTS & HIGHLIGHTS

- Successfully built and **deployed 3 live ML web applications** on cloud (Render)
- **67+ commits** across 6 repositories in February 2026 alone
- Completed job simulations with **3 top global firms:** Tata, Deloitte, BCG X
- Applied real ML deployment skills: dependency management, large-file handling, production-friendly training pipelines
- Containerised applications using **Docker** for production readiness

PROFESSIONAL DEVELOPMENT

Current Focus Areas

- ML model deployment and MLOps practices
- Advanced NLP techniques and Large Language Models
- Dataset analysis and algorithm optimization
- Cloud deployment (Render, Docker, production pipelines)

Open To

Internship opportunities in ML / Data Science — Open source collaboration — Mentorship — Professional networking

I hereby declare that the above information is true to the best of my knowledge and belief.

Place: Bijnor, Uttar Pradesh, India — Date: February 2026
